

Grey's Lobotomy Audience Feedback

Just want to congratulate you on "Grey's Lobotomy". It really is a superb musical - hilarious, as advertised - witty - thought provoking - makes a really enjoyable evening. I will definitely be recommending it to everyone I can think of. Well done!!

Lovely arvo spent watching this fabulous show. It is educational and touches such current topics that need addressing by the higher-ups in the healthcare system. Great cast, interactive with the audience! This should be played to everyone in the healthcare industry!

The show I thought was fantastic!! The cast themselves were fantastic (voices strong and great movement on stage) - knowing a little more of what goes into something like this I was amazed at the output. As a 'drop-in and be entertained' show it worked really well. Even if the audience is not 'medically inclined', there is a lot of laughter along the way.

Great show, hilariously true on so many levels!

A really good send up of the health service, but also with important health messages thrown in. The cast were all excellent. I would highly recommend this show.

Fabulous Show. All on stage were accomplished singers and actors. The script was very funny and the songs good and easy to listen to.

Lots of fun, good singing and all true about the health system!

It was a very entertaining event. Sets were good and actors were very good. A truly accurate representation of the public health situation and the role of the \$ in managing patient health.

Excellent, Laugh out loud funny. Terrific singing and dancing!
